Two-piece cans for preserving meat and fish products

From sheet to can.

Two-piece food cans are manufactured from electrolytic tinplate coated with tin, TFS electrolytic tinplate or aluminium.
The cans are manufactured by the drawing process applying new production technologies in line with good production and hygiene practices, respecting the specific demands of the customer.
The outside of the can is protected by lacquer coating, with or without lithographic print, as per customer specifications.
We offer "Easy Open," "Peel off" and can lids.

Cans are used to package over 1,500 various food products.

Top product quality demands top quality packing cans

Two-piece can quality and safety
The technology applied for the protection of the interior of the can and lid and the type of protective lacquer coating is determined by the content to be packaged in the can.
We offer the use of Bisphenol A-free interior protective lacquers.
The quality of raw materials sourced and of the finished product is guaranteed through cooperation with trusted suppliers and physical and chemical analyses of the raw materials sourced and of the finished product in our internal laboratory.
Video inspection of the can during the manufacturing process.
Product traceability throughout the entire manufacturing process, *from sheet to can*.
Up to five year can durability.

New product development
In collaboration with customers and applying new technologies and tools we are able to develop two-piece cans of various shapes and sizes.

Cans are indefinitely recyclable as steel does not lose its attributes during recycling.

*Steel recycling contributes to the preservation of the natural environment.*
